## Device Drilldown - 582857

### Device Credentials

[Connection Information](#)[Recent Events](#)[State](#)[Device Information](#)[Permissions](#) beta[Metadata](#)[Extension Configuration](#)[Diagnostics](#)[Connection Logs](#)[Device Actions](#)

### Device Credentials

You registered your device to the organization. Add these credentials to the device to connect it to the platform. After the device is connected, you can navigate to view connection and event details.

Organization ID	f1bk1s
Device Type	manager
Device ID	582857
Authentication Method	use-token-auth
Authentication Token	h(AZQiR7yR8S2dKc_5

Authentication tokens are non-recoverable. If you misplace this token, you will need to re-register the device and generate a new authentication token.

[Find out how to add these credentials to your device](#) ↗

### Connection Information

Basic connection information about this device.

Device ID	582857
Device Type	manager
Date Added	2019-07-05T13:11:45.496Z
Added By	zceehya@ucl.ac.uk
Connection Status	Disconnected

### Recent Events

The recent events listed show the live stream of data that is coming and going from this device.

Event	Value	Format	Last Received
-------	-------	--------	---------------

Waiting for device events...

## State

This table shows a list of data points that are reported by this device.

 Showing Raw Data | [No Interfaces Available](#)

Property	Value	Type	Event	Last Received
----------	-------	------	-------	---------------

No data has been received from this device

## Device Information

View basic device information including location and manufacturer.

## Permissions beta

[Edit](#) 

Gateway, as this role can act on behalf of the following devices.

Devices.Browse.Common.GatewayPermissions.

Device ID 

Device Type 

You currently don't have any devices added

## Metadata

The optional metadata field can be used to define custom attributes that you can use if the default attributes do not include all information that you want to use. For example, you might add a company division or work group attribute to devices or device types. Metadata must be entered in JSON format.

## Extension Configuration

This section allows you to interact with operations provided by external extensions configured on your organization and devices.

No extensions are available for this device. Extensions can be configured on the [Extensions Page](#)

## Diagnostics

View diagnostic information from the device.

0 errors reported by the device

### Logs

Severity	Message	Timestamp	
----------	---------	-----------	--

No diagnostic logs are available

## Connection Logs

View logs for the device connection to Watson IoT Platform

Message	Timestamp	
---------	-----------	--

No connection logs are available

## Device Actions

If a device that is connected to Watson IoT Platform uses the Managed Device operation, the device can perform certain actions.

This device is not a managed device and cannot perform any device actions.
